DETAILED ACTION

1. The Preliminary Amendment filed in paper No. 7 (dated 1/08/2002) has been fully considered and made of record. Claims 46-61 are pending in the application has been noted.

Election/Restrictions

- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 46-55 and 61, drawn to an apparatus for processing wire, classified in class 29, subclass 748.
 - II. Claims 56-60, drawn to a method for processing wire, classified in class29, subclass 868.
- 3. The inventions are distinct, each from the other because of the following reasons: Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as by utilizing the pallet for displacing of the wire endwise instead of the endless conveyor as required by claim 46 or by hand.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group I is not required for Group II, these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh Trinh whose telephone number is (703) 305-2887. The examiner can normally be reached on Monday -Thursday 8:00 am to 4:30 pm.
